

A week with Eco

EcoludiK

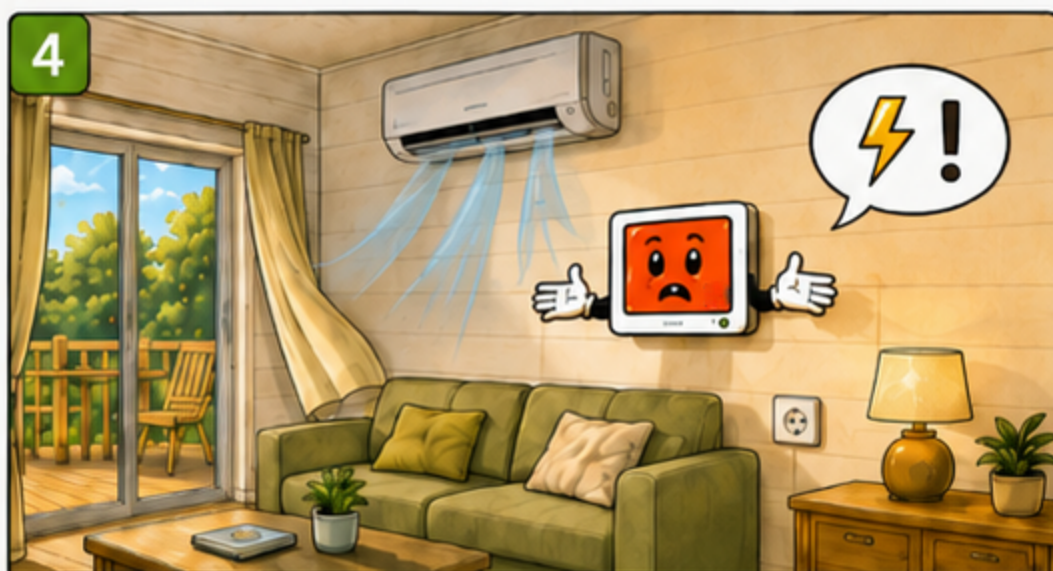

Hi, I'm Eco,
your holiday companion.

Your campsite is working to protect resources. I'm simply here to help you see how water and electricity use changes during your stay.

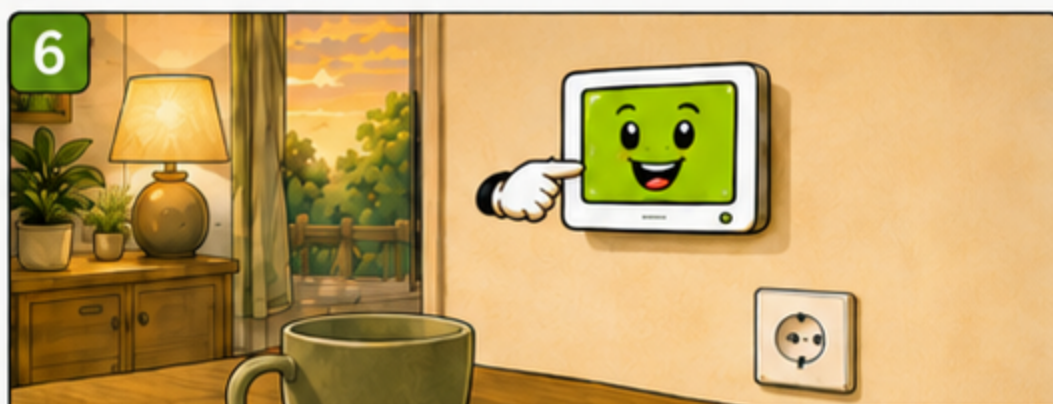

A shorter shower, the tap off while you lather up... every little thing counts towards my day.

Air conditioning or heating on full with the door wide open: that's when my day turns red.

Closing up, switching off... those are the small habits that keep me green.

Every evening, you can see where you stand.

And every morning, everything starts back at zero. New day, new chance to stay green!

Enjoy your holiday !
